EDUCATION

Madhuben & Bhanubhai Patel Institute of Technology (MBIT), CVM University Anand, India
B.Tech, Computer Engineering | CGPA: 8.58 / 10.0 July 2023 – June 2027
• **Coursework:** Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, AI/ML, Cloud Computing

EXPERIENCE

Hi Lab Solution | Full Stack Developer Intern May 2026 – June 2026

- Developed InfraEye, an enterprise LAN monitoring and asset intelligence platform, end-to-end – from the FastAPI backend to the React dashboard – taking it from zero to production in 3 weeks
- Designed a master-agent architecture: a central FastAPI server ingests telemetry from Python agents on Windows endpoints, packaged with PyInstaller for zero-dependency deployment
- Used MongoDB for persistent asset storage with indexed queries for fast cross-device search and a historical audit trail

IBM | Full Stack Development Trainee Aug 2025 – Sep 2025 | Remote

- Completed IBM's structured full-stack program, building and deploying web applications with React.js, Node.js, Express.js, MongoDB, and REST APIs following industry-standard SDLC practices
- Delivered TaskFlow, a team-based task management system, as the capstone project

Flaunch | AI Technology Intern Oct 2024 – Jan 2025 | Remote

- Built LLM-powered chatbot pipelines using Groq API and LLaMA models to automate user interaction workflows
- Built Flavour with Fusion, an AI recipe generator and meal planner using MealDB API, Firebase Auth, and Groq API
- Integrated ML APIs and automation tools into production-level applications

PROJECTS

InfraEye – Enterprise LAN Monitoring & Asset Intelligence | FastAPI, React.js, MongoDB, Python, PyInstaller 2026

- Architected an async FastAPI + Motor (MongoDB) backend supporting 5,000+ concurrent endpoints, with a ~15MB background agent streaming live telemetry every 15 seconds and full hardware/software/license inventory every 5 minutes to 6 hours
- Automated Excel reporting cut manual IT auditing by 95–99%, replacing 15–25 hours/week of manual audits with a 1-click export

TaskFlow – Team Task Management System | React.js, Node.js, Express.js, MongoDB, Tailwind CSS 2025

- IBM capstone: role-based task management (Admin, Manager, Team Member) for 5–50 concurrent users, with JWT auth, bcrypt-hashed passwords, and server-side role-based data filtering
- Live dashboard tracks 6 real-time metrics (total, completed, in-progress, review, to-do, overdue) via parallelized MongoDB queries, auto-refreshing every 30 seconds. **Live: taskflow-ctm.vercel.app**

TECHNICAL SKILLS

Languages: Python, C, C++, SQL

Frontend / Backend: React.js, Next.js, Tailwind CSS | Node.js, Express.js, FastAPI, REST APIs

Databases: MongoDB, PostgreSQL, Firebase

AI / ML: LLM Integration, Groq API, LLaMA, Hugging Face

Networking & Systems: TCP/IP, DNS, DHCP, LAN Monitoring, Windows Administration

Tools: Git, GitHub, Vercel, PyInstaller

HONORS & AWARDS

2nd Runner-Up, Dev Summit 2026 – National-Level Hackathon, Jagannath University, Jaipur (Rs. 10,000) 2026

Top 20 Intern, Flaunch – Rs. 5,000 performance stipend; direct finalist, Unleash LLM Hackathon 2025

IBM GIFT City Office Visit – selected for exclusive Gandhinagar visit among top performers 2025

Google Arcade Program – completed developer program; received Google swag 2024

LEADERSHIP

Secretary, ISTE Student Branch – organize technical workshops; anchor college events 2025 – Present

Design Coordinator, MBIT – posters, banners, and digital creatives for student initiatives 2024 – Present

NSS Coordinator, National Service Scheme – social service and community outreach 2024 – 2025
